DETAILED ACTION

Response to Arguments

Applicant's arguments, see Remarks, filed 10/22/07, with respect to all of the rejections, have been fully considered and are persuasive. All of the rejections have been withdrawn.

Allowable Subject Matter

Claims 18-30 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art made of record does not teach or fairly suggest an electrical connector made of a sheet material having two curved surfaces that form two contacts for coupling tubular fuel cells together wherein the contacts comprise a plurality of parallel open slots disposed along an edge of the sheet material and the slots define a plurality of flexible members. The prior art does allow for a sheet material being used to make electrical connections between tubular fuel cells having a curvature, but does not teach the plurality of parallel open slots that define a plurality of flexible members. There is also no motivation for a skilled artisan to modify the prior art of record to provide said features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
